## **MSA GENERAL CIRCULAR 3/2006**

129813/144

MSA General Circular 1/2006, in connection with the fuel requirements for South African motorsport, refers.

Due to delays in some quarters with the production of the new specification 98 octane unleaded racing fuel, as well as concerns amongst competitors that they have not had adequate time to set up their vehicles to run on this fuel, it has been decided to grant a short-term dispensation to address these issues.

In terms of this dispensation, fuel complying **either** with MSA's **2005 specification** or with the new **2006 specification** shall be legal for use in South African motorsport **until 30 June 2006, or an earlier date stipulated by MSA** depending on circumstances. Following expiry of this dispensation, the only fuel permitted shall be that in accordance with the 2006 specification published in MSA General Circular 1/2006.

The participating fuel companies are urged to make 98 unleaded racing fuel available to competitors as soon as possible, and competitors are urged to use the available time to set their vehicles up correctly to run on this fuel before the expiration of the dispensation.
