MSA KARTING CIRCULAR 5/2010

156931/144

- 1) All Rotax karting competitors are advised that, in accordance with the international regulations, only the following carburetor component combinations are permitted:

COMBINATION 1:

Floats 5.2 gr
Idle Jet 30
Idle Jet Insert 30
Carburetor insert 12.5

OR

COMBINATION 2:

Floats 3.6 gr
Idle Jet 60
Idle Jet Insert 60
Carburetor insert 8.5

ANY OTHER COMBINATION IS ILLEGAL

The above has already been published but, as this change was not well publicised and to avoid any competitor being penalised through poor communication, it will only be enforced from the 26th of March 2010. Until that date the 2009 regulations in this regard will continue to apply.

- 2) Max 175 Class – By popular demand the minimum weight for this class has been increased to 180kg (and logically the name of the class will therefore change to Max 180)
- 3) Max 180 Class - For 2010 the old or new type air box will be permitted as well as both types of clutch.

ADRIAN SCHOLTZ
